

CONSTRUCTION NOTICE / PROJECT NEWS

August 27, 2018 - Nowak & Fraus Engineers, Consulting Engineer for Independence Township, would like to take this opportunity to update you on the work that is scheduled to begin for the Clintonville Road Pathway project.

The project, which includes installation of an 8' wide asphalt pathway and 10' wide wood boardwalk, along the east side of Clintonville Road, between Maybee and Waldon Roads, is beginning on Monday, August 27. The contractor, LJ Construction, along with their sub-contractor, Owen's Tree Service, will begin with placement of protective silt fence and tree and brush clearing along the route of the new path. All permits have been acquired (MDEQ, Road Commission, Soil Erosion, etc.) and the work will be isolated to within both the road ROW and acquired private easements along the pathway.

Following clearing operations, future work will include grading, aggregate placement and boardwalk foundation work. The contractor team will be working through early December, based upon favorable weather conditions. A representative from our office will be on-site to monitor this work as it proceeds and will be available for any resident questions or concerns.

Otherwise, throughout the duration of the project, if there are any specific concerns or questions regarding the project, feel free to contact Steve Sutton, Nowak & Fraus Engineers, at 248-635-6571, at any time. If you would like to be added to a weekly email notification list, please forward your email address to Steve Sutton at swsutton@nfe-engr.com.

Thank you all in advance and we look forward to a very successful project!
